

Roles & Mapping Page

Product Requirements Document — DES-280

PROJECT	ROUTE	SECTION	DATE	STATUS
5Mins Admin	/roles	People & Teams	March 2026	Ready for Dev

1. Context & Objective

Admins need to browse pre-built 5Mins roles, copy them to their company, and create custom roles with AI-suggested skills. This introduces a new page under **People & Teams** with two tabs:

- **5Mins Roles** — Read-only library of curated role templates
- **Company Roles** — Full CRUD for the company's own roles

HRIS Mapping is **out of scope** for this iteration.

Key Changes from Meeting (Override Specs)

- **No "Alternative names" field** — removed entirely, creates friction
- **No AI suggestions when copying from library** — template already has curated skills
- **No confidence badges/indicators** — removed high/low match, creates false confusion
- **AI results as pre-checked removable chips** — not grouped checkboxes with scores
- **Job description upload/paste** added for AI suggestions (alongside role name + short description)
- **Duplicate action** added on company roles table rows

2. Data Model

Entity	Fields
FiveMinsRole	id , name , category , description , skills[] , industries[] , leadership , assignedCount
CompanyRole	id , name , leadership , skills[] , employeeCount
Skill	id , name , category

Mock Data: 15–20 library roles across 7 categories (Sales, Hospitality, Finance, Technology, Marketing, HR, Analytics), ~40 skills across those categories.

3. Page Layout

Standard admin layout: LeftSidebar + main content area. Follows the same pattern as the People page.

Tab Bar

- Two tabs: "5Mins Roles" (with book icon) and "Company Roles"
- Active tab: underline with secondary-500 colour
- Navigation item: "Roles & Mapping" added under People & Teams in the sidebar

4. 5Mins Roles Tab

Info Banner

Persistent banner at the top. Light background, book icon, "5Mins Role Library" heading with explanatory body text.

Filter Bar

Element	Spec
Category chips	Single-select, "All" default. Categories: All, Sales, Hospitality, Finance, Technology, Marketing, HR, Analytics
Search	220px wide, searches by role name
Export	Ghost button, right-aligned

Table Columns

Column	Width	Content
Role Name	~35%	Text, clickable to expand
Category	auto	Neutral badge
Skills	auto	Count number
Assigned	auto	Count or "—"
Action	auto	"Copy" outlined button

Expandable Rows

Accordion behaviour — only one row expanded at a time. Expanded panel shows:

- Role description text
- Industry focus tags
- Skill chips (read-only, grey)

- "Copy to My Roles" primary button

Empty State

"No roles match your search" when filters return 0 results.

5. Company Roles Tab

Toolbar

Element	Spec
Search	300px, filters by role name
Export	Ghost button
"+ Create Role"	Primary button, right-aligned

Table Columns

Column	Width	Content
Role Name	~40%	Text
Employees	auto	Count number
Skills	auto	Count number
Actions	auto	"Edit" ghost btn + "Duplicate" ghost btn

Footer

Muted text: "X roles · Y employees assigned"

Empty State

"No roles yet. Create your first role or copy one from the 5Mins library."

- "Browse library →" link (switches to 5Mins tab)
- "+ Create Role" primary button

6. Role Panel (Slide-in)

480px wide panel, slides from the right, dark backdrop, sticky footer. Supports 3 modes.

6.1 — Create Mode (2-step wizard)

Step 1: Details

- **Role Name** (required text input)
- **Leadership checkbox** — "This is a leadership role" + helper text: "AI will suggest management and coaching skills"
- **Description** (optional textarea, 3 rows) — placeholder: "Mention key activities, tools, and focus areas"
- **Job Description** (optional, larger textarea) — placeholder: "Paste a job description for better AI suggestions"
- Below divider: "Skip — pick skills manually" link (left) +  **Suggest Skills with AI** purple button (right)
- AI button disabled until role name is non-empty

AI Loading State

Purple pulsing dot + "Analysing role and matching skills..." + skeleton blocks. Simulated ~2s delay, then auto-advances to Step 2.

Step 2: Skills (AI mode)

- AI banner: "♦ AI suggested X skills based on your input" + "Re-suggest" ghost button
- All suggested skills as **removable cyan chips** (pre-checked, no confidence scores)
- "Search and add more skills" collapsible section below
- Summary panel at bottom: role name, skill count, leadership badge, selected chip preview

Step 2: Skills (Manual/Skip mode)

- "Search and select skills:" label
- Selected skills as removable cyan chips
- Search input with dropdown results (checkbox + name + category)

Footer: "← Back" (left) + "Cancel" ghost + "Create Role" primary (right). Create disabled if 0 skills selected.

6.2 — Copy Mode (2-step wizard)

Step 1: Details

- Title: "Copy from 5Mins Library"
- Subtitle: "Based on: [Role Name] — customise name and skills below"
- Role Name (pre-filled, editable)
- Leadership checkbox (pre-set from library role)
- **No description field, no AI button, no skip link**

Footer: "Cancel" ghost + "Continue →" primary

Step 2: Skills

- "Skills from 5Mins library — remove or add as needed:"
- Library skills as removable cyan chips
- "Search and add more skills" collapsible section
- Summary panel

Footer: "← Back" + "Cancel" ghost + "Create Role" primary

On save: Toast "X copied to your company roles", auto-switch to Company Roles tab.

6.3 — Edit Mode (no steps)**Single View**

- Title: "Edit Role: [Name]"
- Subtitle: "Skill changes will update recommendations for assigned employees."
- Role Name + Leadership checkbox (editable inline)
- Skills as removable chips + "◆ Re-suggest with AI" button + "Search and add more"
- Warning banner if employees > 0: "X employees have this role..."

Footer: "Cancel" ghost + "Save Changes" primary

6.4 — Duplicate Flow

Clicking "Duplicate" on a company role opens the panel in **create mode**, pre-filled with that role's name + " (copy)" and its existing skills. Behaves exactly like create but pre-populated.

7. AI Skill Suggestion (Simulation)

Aspect	Detail
Input	Role name + description + job description + isLeadership flag
Output	Flat list of 8–15 <code>Skill</code> objects from catalogue (no confidence scores, no grouping)
Delay	Simulated ~2 second delay
UX	Results appear as pre-checked removable cyan chips

8. File Plan

New Files CREATE

File	Purpose
<code>src/pages/roles/data/mockRoles.ts</code>	Mock data: 5Mins roles, company roles, skill catalogue
<code>src/pages/roles/Roles.tsx</code>	Main page component with sidebar + tabs
<code>src/pages/roles/Roles.css</code>	All styles (BEM, <code>roles-</code> prefix)
<code>src/pages/roles/components/FiveMinsRolesTab.tsx</code>	Library tab: banner, filters, expandable table
<code>src/pages/roles/components/CompanyRolesTab.tsx</code>	Company tab: CRUD table, empty state
<code>src/pages/roles/components/RolePanel.tsx</code>	Slide-in panel: create/copy/edit wizard

Modified Files MODIFY

File	Change
<code>src/App.tsx</code>	Add <code><Route path="/roles" /></code>
<code>src/components/LeftSidebar/LeftSidebar.tsx</code>	Add "Roles & Mapping" nav item under People & Teams

9. Reusable Components

- `LeftSidebar` — `src/components/LeftSidebar/`
- `ToastContainer` + `useToast` — `src/components/Toast/`
- `Checkbox` — `src/components/Checkbox/`
- Design tokens — `src/styles/tokens.css`

- Tab pattern — from `People.css` (`.people-tab` classes)
- Search input pattern — from `People.css` (`.people-search`)
- Table row pattern — flexbox rows from People page

10. Verification Checklist

1. `npm run dev` → navigate to `/roles`
2. **5Mins Roles:** filter by category, search, expand rows, copy a role
3. **Company Roles:** create (AI path + manual), edit, duplicate
4. **Copy flow:** auto-switch to Company Roles tab with toast
5. **Toasts:** shown for all create/copy/edit/duplicate actions
6. **Empty states:** no company roles, empty search results
